gemalto

Subject: Product names

La Ciotat, May 9th 2018

Dear Customers,

Please note that the Gemalto product names may differ depending on the targeted application.

Particularly, I would like to inform you that:

- The product **IAS Classic v4.4.2 on MultiApp v4.0.1** is renamed, for Enterprise & CyberSecurity applications, **IDPrime 940** (contact interface smartcard) or **IDPrime 3940** (dual interface smartcard).

There is no product modification associated to these name changes.

Consequently, all the related documents, including those related to the Common Criteria certification, remain valid.

Yours sincerely,

Arnaud LOTIGIER

Product Owner
Enterprise & CyberSecurity
