

Certification Authority Voluntary Best Practices – Self Assertion of Adoption

As an authorized representative of _____, I attest to our support and respective adoption of the Certification Authority Best Practices published by the Online Trust Alliance on March 1, 2013, as outlined at <https://otalliance.org/capractices.html>. Submit completed form to: staff@otalliance.org

While we recognize that adherence to Certification Authority Best Practices is no guarantee of security, we believe that following these voluntary steps will meaningfully enhance the integrity and trust in the SSL supply chain. I hereby agree that my company may be listed by OTA as implementing the following practices:

Adopted	CA Practices
<input type="checkbox"/>	Hires qualified employees who receive background checks and regular training.
<input type="checkbox"/>	Maintains CA’s statement of practices (CPS) current with annual revisions.
<input type="checkbox"/>	Maintains a security incident response plan.
<input type="checkbox"/>	Verifies the identity of certificate applicants by checking independently reliable (e.g. third party) records.
<input type="checkbox"/>	Carefully follows a quality control program to prevent erroneous certificate issuance.
<input type="checkbox"/>	Engages auditors who have computer security auditing experience and specialized training.
<input type="checkbox"/>	CA audit reports attest to compliance with CAB Forum guidelines, such as the EV Guidelines and Baseline Requirements.
<input type="checkbox"/>	Trust anchor root keys are kept off line or air-gapped and protected by multiple security layers and require at least two people to activate.
<input type="checkbox"/>	Supports both CRL and OCSP, and responds to certificate status queries within seconds.
<input type="checkbox"/>	Maintains and regularly tests its business continuity and disaster recovery plans.
<input type="checkbox"/>	Regularly reviews computer activity logs, which are also recorded in a separate and reliable logging system.
<input type="checkbox"/>	Conducts regular vulnerability scans and penetration tests.
<input type="checkbox"/>	Stays current with developments by participating in industry-related organizations.
