1. INTRODUCTION

The Guidelines describe an integrated set of technologies, protocols, identity proofing, lifecycle management, and auditing practices specifying the minimum requirements that must be met in order to issue and maintain Extended Validation Certificates (“EV Certificates”) concerning an organization. Subject Organization information from valid EV Certificates can then be used in a special manner by certain relying-party software applications (e.g., browser software) in order to provide users with a trustworthy confirmation of the identity of the entity that controls the Web site or other services they are accessing. Although initially intended for use in establishing Web-based data communication conduits via TLS/SSL protocols, extensions are envisioned for S/MIME, time-stamping, VoIP, IM, Web services, etc.

The primary purposes of Extended Validation Certificates are to: 1) identify the legal entity that controls a Web or service site, and 2) enable encrypted communications with that site. The secondary purposes include significantly enhancing cybersecurity by helping establish the legitimacy of an organization claiming to operate a Web site, and providing a vehicle that can be used to assist in addressing problems related to distributing malware, phishing, identity theft, and diverse forms of online fraud.

Notice to Readers

The Guidelines for the Issuance and Management of Extended Validation Certificates present criteria established by the CA/Browser Forum for use by certification authorities when issuing, maintaining, and revoking certain digital certificates for use in Internet Web site commerce. These Guidelines may be revised from time to time, as appropriate, in accordance with procedures adopted by the CA/Browser Forum. Questions or suggestions concerning these guidelines may be directed to the CA/Browser Forum at questions@cabforum.org.

The CA/Browser Forum

The CA/Browser Forum is a voluntary open organization of certification authorities and suppliers of Internet browsers and other relying-party software applications. Membership is listed at <https://cabforum.org/members/>. ## 1.1 Scope These Guidelines for the issuance and management of Extended Validation Certificates describe certain of the minimum requirements that a Certification Authority must meet in order to issue Extended Validation Certificates. Subject Organization information from Valid EV Certificates may be displayed in a special manner by certain relying-party software applications (e.g., browser software) in order to provide users with a trustworthy confirmation of the identity of the entity that controls the Web site they are accessing. These Guidelines incorporate the Baseline Requirements established by the CA/Browser Forum by reference. A copy of the Baseline Requirements is available on the CA/Browser Forum’s website at <https://www.cabforum.org/>.

These Guidelines address the basic issue of validating Subject identity information in EV Certificates and some related matters. They do not address all of the related matters, such as certain technical and operational ones. This version of the Guidelines addresses only requirements for EV Certificates intended to be used for SSL/TLS authentication on the Internet and for code signing. Similar requirements for S/MIME, time-stamping, VoIP, IM, Web services, etc. may be covered in future versions.

These Guidelines do not address the verification of information, or the issuance, use, maintenance, or revocation of EV Certificates by enterprises that operate their own Public Key Infrastructure for internal purposes only, where its Root CA Certificate is not distributed by any

Implementers' Note: Version 1.3 of these EV Guidelines was published on 20 November 2010 and supplemented through May 2012 when version 1.4 was published. ETSI TS 102 042 and ETSI TR 101 564 Technical Report: Guidance on ETSI TS 102 042 for Issuing Extended Validation Certificates for Auditors and CSPs reference version 1.3 of these EV Guidelines, and ETSI Draft EN 319 411-1 references version 1.4. Version 1.4.5 of Webtrust(r) for Certification Authorities – Extended Validation Audit Criteria references version 1.4.5 of these EV Guidelines. As illustrated in the Document History table above, the CA/Browser Forum continues to improve relevant industry guidelines, including this document, the Baseline Requirements, and the Network and Certificate System Security Requirements. We encourage all CAs to conform to each revision on the date specified without awaiting a corresponding update to an applicable audit criterion. In the event of a conflict between an existing audit criterion and a guideline revision, we will communicate with the audit community and attempt to resolve any uncertainty. We will respond to implementation questions directed to questions@cabforum.org. Our coordination with compliance auditors will

continue as we develop guideline revision cycles that harmonize with the revision cycles for audit criteria, the compliance auditing periods and cycles of CAs, and the CA/Browser Forum's guideline implementation dates.

~~These Guidelines for the issuance and management of Extended Validation Certificates describe certain of the minimum requirements that a Certification Authority must meet in order to issue Extended Validation Certificates. Subject Organization information from Valid EV Certificates may be displayed in a special manner by certain relying party software applications (e.g., browser software) in order to provide users with a trustworthy confirmation of the identity of the entity that controls the Web site they are accessing. These Guidelines incorporate the Baseline Requirements established~~

1.3.1 Certification authorities

1.3.2 Registration authorities

~~The CA MAY delegate the performance of all or any part of a requirement of these Guidelines to an Affiliate or a Registration Authority (RA) or subcontractor, provided that the process employed by the CA fulfills all of the requirements of Section 3.2.13. Affiliates and/Browser Forum by reference. A copy of the Baseline Requirements is available on the CA/Browser Forum's website at or RAs must comply with the qualification requirements of Section 5.3.2.~~

~~These Guidelines address the basic issue of validating Subject identity information in EV Certificates and some related matters. They do not address all of the related matters, such as certain technical and operational ones. This version of the Guidelines addresses only requirements for EV Certificates intended to be used for SSL/TLS authentication on the Internet and for code signing. Similar requirements for S/MIME, time-stamping, VoIP, IM, Web services, etc. may be covered in future versions. The CA SHALL verify that the Delegated Third Party's personnel involved in the issuance of a Certificate meet the training and skills requirements of Section 5.3 and the document retention and event logging requirements of Section 5.4.~~

~~These Guidelines do not address the verification of information, or the issuance, use, maintenance, or revocation. In all cases, the CA MUST contractually obligate each Affiliate, RA, subcontractor, and Enterprise RA to comply with all applicable requirements in these Guidelines and to perform them as required of the CA itself. The CA SHALL enforce these obligations and internally audit each Affiliate's, RA's, subcontractor's, and Enterprise RA's compliance with these Requirements on an annual basis.~~

1.3.2.1 Enterprise Registration authorities

~~The CA MAY contractually authorize a Subscriber to perform the RA function and authorize the CA to issue additional EV Certificates. In such case, the Subscriber SHALL be considered an Enterprise RA, and the following requirements SHALL apply:~~

- ~~1. In all cases, the Subscriber MUST be an organization verified by the CA in accordance with these Guidelines;~~
- ~~2. The CA MUST impose these limitations as a contractual requirement with the Enterprise RA and monitor compliance by the Enterprise RA; and~~
- ~~3. The Final Cross-Correlation and Due Diligence requirements of Section 3.2.13 MAY be performed by a single person representing the Enterprise RA.~~

Enterprise RAs that authorize the issuance of EV Certificates by enterprises that operate their own Public Key Infrastructure for internal purposes only, where its Root CA Certificate is not distributed by any Application Software Supplier, solely for its own organization are exempted from the audit requirements of Section 8.1. In all other cases, the requirements of Section 8.1 SHALL apply.

1.4 Certificate usage

1.4.1 Appropriate certificate uses

EV Certificates are intended for establishing Web-based data communication conduits via the TLS/SSL protocols and for verifying the authenticity of executable code.

1.4.1.1 Primary Purposes

The primary purposes of an EV Certificate are to:

1. **Identify the legal entity that controls a Web site:** Provide a reasonable assurance to the user of an Internet browser that the Web site the user is accessing is controlled by a specific legal entity identified in the EV Certificate by name, address of Place of Business, Jurisdiction of Incorporation or Registration and Registration Number or other disambiguating information; and
2. **Enable encrypted communications with a Web site:** Facilitate the exchange of encryption keys in order to enable the encrypted communication of information over the Internet between the user of an Internet browser and a Web site.

1.4.1.2 Secondary Purposes

The secondary purposes of an EV Certificate are to help establish the legitimacy of a business claiming to operate a Web site or distribute executable code, and to provide a vehicle that can be used to assist in addressing problems related to phishing, malware, and other forms of online identity fraud. By providing more reliable third-party verified identity and address information regarding the business, EV Certificates may help to:

1. Make it more difficult to mount phishing and other online identity fraud attacks using Certificates;
2. Assist companies that may be the target of phishing attacks or online identity fraud by providing them with a tool to better identify themselves to users; and
3. Assist law enforcement organizations in their investigations of phishing and other online identity fraud, including where appropriate, contacting, investigating, or taking legal action against the Subject.

1.4.2 Prohibited certificate uses

EV Certificates focus only on the identity of the Subject named in the Certificate, and not on the behavior of the Subject. As such, an EV Certificate is **not** intended to provide any assurances, or otherwise represent or warrant:

1. That the Subject named in the EV Certificate is actively engaged in doing business;
2. That the Subject named in the EV Certificate complies with applicable laws;
3. That the Subject named in the EV Certificate is trustworthy, honest, or reputable in its business dealings; or
4. That it is “safe” to do business with the Subject named in the EV Certificate.

 - i. records provided by the applicable phone company;
 - ii. a QGIS, QTIS, or QIIS; or
 - iii. a Verified Professional Letter; and
- B. Confirm the Verified Method of Communication by using it to obtain an affirmative response sufficient to enable a reasonable person to conclude that the Applicant, or a Parent/Subsidiary or Affiliate of Applicant, can be contacted reliably by using the Verified Method of Communication.

3.2.6 Verification of Applicant's Operational Existence

3.2.6.1 Verification Requirements

The CA MUST verify that the Applicant has the ability to engage in business by verifying the Applicant's, or Affiliate/Parent/Subsidiary Company's, operational existence. The CA MAY rely on

its verification of a Government Entity's legal existence under [Section 3.2.2](#) as verification of a Government Entity's operational existence.

3.2.6.2 Acceptable Methods of Verification

To verify the Applicant's ability to engage in business, the CA MUST verify the operational existence of the Applicant, or its Affiliate/Parent/Subsidiary Company, by:

1. Verifying that the Applicant, Affiliate, Parent Company, or Subsidiary Company has been in existence for at least three years, as indicated by the records of an Incorporating Agency or Registration Agency;
2. Verifying that the Applicant, Affiliate, Parent Company, or Subsidiary Company is listed in either a current QIIS or QTIS;
3. Verifying that the Applicant, Affiliate, Parent Company, or Subsidiary Company has an active current Demand Deposit Account with a Regulated Financial Institution by receiving authenticated documentation of the Applicant's, Affiliate's, Parent Company's, or Subsidiary Company's Demand Deposit Account directly from a Regulated Financial Institution; or
4. Relying on a Verified Professional Letter to the effect that the Applicant has an active current Demand Deposit Account with a Regulated Financial Institution.

3.2.7 Verification of Applicant's Domain Name

3.2.7.1 Verification Requirements

1. For each Fully-Qualified Domain Name listed in a Certificate which is not an Onion Domain Name, the CA SHALL confirm that, as of the date the Certificate was issued, the Applicant (or the Applicant's Parent Company, Subsidiary Company, or Affiliate, collectively referred to as "Applicant" for the purposes of this section) either is the Domain Name Registrant or has control over the FQDN using a procedure specified in Section 3.2.2.4 of the Baseline Requirements. For a Certificate issued to an Onion Domain Name, the CA SHALL confirm that, as of the date the Certificate was issued, the Applicant's control over the Onion Domain Name in accordance with Appendix B of the Baseline Requirements.
2. **Mixed Character Set Domain Names:** EV Certificates MAY include Domain Names containing mixed character sets only in compliance with the rules set forth by the domain registrar. The CA MUST visually compare any Domain Names with mixed character sets with known high risk domains. If a similarity is found, then the EV Certificate Request MUST be flagged as High Risk. The CA must perform reasonably appropriate additional authentication and verification to be certain beyond reasonable doubt that the Applicant and the target in question are the same organization.

3.2.8 Verification of Name, Title, and Authority of Contract Signer and Certificate Approver

3.2.8.1 Verification Requirements

For both the Contract Signer and the Certificate Approver, the CA MUST verify the following.

3. **EV Authority of Certificate Approver:** The CA MUST verify, through a source other than the Certificate Approver him- or herself, that the Certificate Approver is expressly authorized by the Applicant to do the following, as of the date of the EV Certificate Request:
 - A. Submit, and, if applicable, authorize a Certificate Requester to submit, the EV Certificate Request on behalf of the Applicant; and
 - B. Provide, and, if applicable, authorize a Certificate Requester to provide, the information requested from the Applicant by the CA for issuance of the EV Certificate; and
 - C. Approve EV Certificate Requests submitted by a Certificate Requester.

3.2.8.2 Acceptable Methods of Verification – Name, Title and Agency

Acceptable methods of verification of the name, title, and agency status of the Contract Signer and the Certificate Approver include the following.

1. **Name and Title:** The CA MAY verify the name and title of the Contract Signer and the Certificate Approver by any appropriate method designed to provide reasonable assurance that a person claiming to act in such a role is in fact the named person designated to act in such role.
2. **Agency:** The CA MAY verify the agency of the Contract Signer and the Certificate Approver by:
 - A. Contacting the Applicant using a Verified Method of Communication for the Applicant, and obtaining confirmation that the Contract Signer and/or the Certificate Approver, as applicable, is an employee;
 - B. Obtaining an Independent Confirmation From the Applicant (as described in [Section 3.2.11.4](#)), or a Verified Professional Letter verifying that the Contract Signer and/or the Certificate Approver, as applicable, is either an employee or has otherwise been appointed as an agent of the Applicant; or
 - C. Obtaining confirmation from a QIIS or QGIS that the Contract Signer and/or Certificate Approver is an employee of the Applicant.

The CA MAY also verify the agency of the Certificate Approver via a certification from the Contract Signer (including in a contract between the CA and the Applicant signed by the Contract Signer), provided that the employment or agency status and Signing Authority of the Contract Signer has been verified.

3.2.8.3 Acceptable Methods of Verification – Authority

Acceptable methods of verification of the Signing Authority of the Contract Signer, and the EV Authority of the Certificate Approver, as applicable, include:

1. **Verified Professional Letter:** The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, MAY be verified by reliance on a Verified Professional Letter;

2. **Corporate Resolution:** The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, MAY be verified by reliance on a properly authenticated corporate resolution that confirms that the person has been granted such Signing Authority, provided that such resolution is
 - i. certified by the appropriate corporate officer (e.g., secretary), and
 - ii. the CA can reliably verify that the certification was validly signed by such person, and that such person does have the requisite authority to provide such certification;
3. **Independent Confirmation from Applicant:** The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, MAY be verified by obtaining an Independent Confirmation from the Applicant (as described in [Section 3.2.11.4](#));
4. **Contract between CA and Applicant:** The EV Authority of the Certificate Approver MAY be verified by reliance on a contract between the CA and the Applicant that designates the Certificate Approver with such EV Authority, provided that the contract is signed by the Contract Signer and provided that the agency and Signing Authority of the Contract Signer have been verified;
5. **Prior Equivalent Authority:** The signing authority of the Contract Signer, and/or the EV authority of the Certificate Approver, MAY be verified by relying on a demonstration of Prior Equivalent Authority.
 - A. Prior Equivalent Authority of a Contract Signer MAY be relied upon for confirmation or verification of the signing authority of the Contract Signer when the Contract Signer has executed a binding contract between the CA and the Applicant with a legally valid and enforceable seal or handwritten signature and only when the contract was executed more than 90 days prior to the EV Certificate application. The CA MUST record sufficient details of the previous agreement to correctly identify it and associate it with the EV application. Such details MAY include any of the following:
 - i. Agreement title,
 - ii. Date of Contract Signer's signature,
 - iii. Contract reference number, and
 - iv. Filing location.
 - B. Prior Equivalent Authority of a Certificate Approver MAY be relied upon for confirmation or verification of the EV Authority of the Certificate Approver when the Certificate Approver has performed one or more of the following:
 - i. Under contract to the CA, has served (or is serving) as an Enterprise RA for the Applicant, or
 - ii. Has participated in the approval of one or more certificate requests, for certificates issued by the CA and which are currently and verifiably in use by the Applicant. In this case the CA MUST have contacted the Certificate Approver by phone at a previously validated phone number or have accepted a signed and notarized letter approving the certificate request.
6. **QIIS or QGIS:** The Signing Authority of the Contract Signer, and/or the EV Authority of the Certificate Approver, MAY be verified by a QIIS or QGIS that identifies the Contract Signer and/or the Certificate Approver as a corporate officer, sole proprietor, or other senior official of the Applicant.

7. **Contract Signer's Representation/Warranty:** Provided that the CA verifies that the Contract Signer is an employee or agent of the Applicant, the CA MAY rely on the signing authority of the Contract Signer by obtaining a duly executed representation or warranty from the Contract Signer that includes the following acknowledgments:
- A. That the Applicant authorizes the Contract Signer to sign the Subscriber Agreement on the Applicant's behalf,
 - B. That the Subscriber Agreement is a legally valid and enforceable agreement,
 - C. That, upon execution of the Subscriber Agreement, the Applicant will be bound by all of its terms and conditions,
 - D. That serious consequences attach to the misuse of an EV certificate, and
 - E. The contract signer has the authority to obtain the digital equivalent of a corporate seal, stamp or officer's signature to establish the authenticity of the company's Web site.

Note: An example of an acceptable representation/warranty appears in [Appendix E](#).

3.2.8.4 Pre-Authorized Certificate Approver

Where the CA and Applicant contemplate the submission of multiple future EV Certificate Requests, then, after the CA:

- 1. Has verified the name and title of the Contract Signer and that he/she is an employee or agent of the Applicant; and
- 2. Has verified the Signing Authority of such Contract Signer in accordance with one of the procedures in [Section 3.2.8.3](#).

The CA and the Applicant MAY enter into a written agreement, signed by the Contract Signer on behalf of the Applicant, whereby, for a specified term, the Applicant expressly authorizes one or more Certificate Approver(s) designated in such agreement to exercise EV Authority with respect to each future EV Certificate Request submitted on behalf of the Applicant and properly authenticated as originating with, or otherwise being approved by, such Certificate Approver(s).

Such an agreement MUST provide that the Applicant shall be obligated under the Subscriber Agreement for all EV Certificates issued at the request of, or approved by, such Certificate Approver(s) until such EV Authority is revoked, and MUST include mutually agreed-upon provisions for:

- i. authenticating the Certificate Approver when EV Certificate Requests are approved,
- ii. periodic re-confirmation of the EV Authority of the Certificate Approver,
- iii. secure procedures by which the Applicant can notify the CA that the EV Authority of any such Certificate Approver is revoked, and
- iv. such other appropriate precautions as are reasonably necessary.

3.2.9 Verification of Signature on Subscriber Agreement and EV Certificate Requests

Both the Subscriber Agreement and each non-pre-authorized EV Certificate Request MUST be signed. The Subscriber Agreement MUST be signed by an authorized Contract Signer. The EV Certificate Request MUST be signed by the Certificate Requester submitting the document, unless the Certificate Request has been pre-authorized in line with [Section 3.2.8.4](#). If the Certificate Requester is not also an authorized Certificate Approver, then an authorized Certificate Approver MUST independently approve the EV Certificate Request. In all cases, applicable signatures MUST be a legally valid and contain an enforceable seal or handwritten signature (for a paper Subscriber

Agreement and/or EV Certificate Request), or a legally valid and enforceable electronic signature (for an electronic Subscriber Agreement and/or EV Certificate Request), that binds the Applicant to the terms of each respective document.

3.2.9.1 Verification Requirements

1. **Signature:** The CA MUST authenticate the signature of the Contract Signer on the Subscriber Agreement and the signature of the Certificate Requester on each EV Certificate Request in a manner that makes it reasonably certain that the person named as the signer in the applicable document is, in fact, the person who signed the document on behalf of the Applicant.
2. **Approval Alternative:** In cases where an EV Certificate Request is signed and submitted by a Certificate Requester who does not also function as a Certificate Approver, approval and adoption of the EV Certificate Request by a Certificate Approver in accordance with the requirements of [Section 3.2.10](#) can substitute for authentication of the signature of the Certificate Requester on such EV Certificate Request.

3.2.9.2 Acceptable Methods of Signature Verification

Acceptable methods of authenticating the signature of the Certificate Requester or Contract Signer include the following:

1. Contacting the Applicant using a Verified Method of Communication for the Applicant, for the attention of the Certificate Requester or Contract Signer, as applicable, followed by a response from someone who identifies themselves as such person confirming that he/she did sign the applicable document on behalf of the Applicant;
2. A letter mailed to the Applicant's or Agent's address, as verified through independent means in accordance with these Guidelines, for the attention of the Certificate Requester or Contract Signer, as applicable, followed by a response through a Verified Method of Communication from someone who identifies themselves as such person confirming that he/she did sign the applicable document on behalf of the Applicant;
3. Use of a signature process that establishes the name and title of the signer in a secure manner, such as through use of an appropriately secure login process that identifies the signer before signing, or through use of a digital signature made with reference to an appropriately verified certificate; or
4. Notarization by a notary, provided that the CA independently verifies that such notary is a legally qualified notary in the jurisdiction of the Certificate Requester or Contract Signer.

3.2.10 Verification of Approval of EV Certificate Request

3.2.10.1 Verification Requirements

In cases where an EV Certificate Request is submitted by a Certificate Requester, before the CA issues the requested EV Certificate, the CA MUST verify that an authorized Certificate Approver reviewed and approved the EV Certificate Request.

3.2.10.2 Acceptable Methods of Verification

Acceptable methods of verifying the Certificate Approver's approval of an EV Certificate Request include:

1. Contacting the Certificate Approver using a Verified Method of Communication for the Applicant and obtaining oral or written confirmation that the Certificate Approver has reviewed and approved the EV Certificate Request;
2. Notifying the Certificate Approver that one or more new EV Certificate Requests are available for review and approval at a designated access-controlled and secure Web site, followed by a login by, and an indication of approval from, the Certificate Approver in the manner required by the Web site; or
3. Verifying the signature of the Certificate Approver on the EV Certificate Request in accordance with [Section 3.2.9](#).

3.2.11 Verification of Certain Information Sources

In circumstances where the opinion is digitally signed, in a manner that confirms the authenticity of the document and the identity of the signer, as verified by the CA in [Section 3.2.11.1 \(2\)\(A\)](#), no further verification of authenticity is required.

3.2.11.2 Verified Accountant Letter

1. **Verification Requirements:** Before relying on an accountant letter submitted to the CA, the CA MUST verify that such accountant letter meets the following requirements:

Verification of license MUST be through the member organization or regulatory organization in the Accounting Practitioner's country or jurisdiction that is appropriate to contact when verifying an accountant's license to practice in that country or jurisdiction. Such country or jurisdiction must have an accounting standards body that maintains full membership status with the International Federation of Accountants.

The Verified Accountant Letter MAY also include disclaimers and other limitations customary in the Accounting Practitioner's jurisdiction, provided that the scope of the disclaimed responsibility is not so great as to eliminate any substantial risk (financial, professional, and/or reputational) to the Accounting Practitioner, should the Verified Accountant Letter prove to be erroneous. Acceptable forms of Verified Accountant Letter are attached as [Appendix C](#).
 - C. **Authenticity:** To confirm the authenticity of the accountant's opinion, the CA MUST make a telephone call or send a copy of the Verified Accountant Letter back to the

The CA MUST make a telephone call to the Third-Party Validator and obtain confirmation from them or their assistant that they performed the face-to-face validation. The CA MAY rely upon self-reported information obtained from the Third-Party Validator for the sole purpose of performing this verification process. In circumstances where the attestation is digitally signed, in a manner that confirms the authenticity of the documents, and the identity of the signer as verified by the CA in [Section 3.2.11.3 \(1\)\(A\)](#), no further verification of authenticity is required.

3.2.11.4 Independent Confirmation From Applicant

An Independent Confirmation from the Applicant is a confirmation of a particular fact (e.g., confirmation of the employee or agency status of a Contract Signer or Certificate Approver, confirmation of the EV Authority of a Certificate Approver, etc.) that is:

- A. Received by the CA from a Confirming Person (someone other than the person who is the

subject of the inquiry) that has the appropriate authority to confirm such a fact, and who represents that he/she has confirmed such fact;

- B. Received by the CA in a manner that authenticates and verifies the source of the confirmation; and
- C. Binding on the Applicant.

An Independent Confirmation from the Applicant MAY be obtained via the following procedure:

1. **Confirmation Request:** The CA MUST initiate a Confirmation Request via an appropriate out-of-band communication, requesting verification or confirmation of the particular fact at issue as follows:

A. **Addressee:** The Confirmation Request MUST be directed to:

- i. A position within the Applicant's organization that qualifies as a Confirming Person (e.g., Secretary, President, CEO, CFO, COO, CIO, CSO, Director, etc.) and is identified by name and title in a current QGIS, QIIS, QTIS, Verified Legal Opinion, Verified Accountant Letter, or by contacting the Applicant using a Verified Method of Communication; or
- ii. The Applicant's Registered Agent or Registered Office in the Jurisdiction of Incorporation as listed in the official records of the Incorporating Agency, with instructions that it be forwarded to an appropriate Confirming Person; or
- iii. A named individual verified to be in the direct line of management above the Contract Signer or Certificate Approver by contacting the Applicant's Human Resources Department by phone or mail (at the phone number or address for the Applicant's Place of Business, verified in accordance with these Guidelines).

B. **Means of Communication:** The Confirmation Request MUST be directed to the Confirming Person in a manner reasonably likely to reach such person. The following options are acceptable:

- i. By paper mail addressed to the Confirming Person at:
 - 1. The address of the Applicant's Place of Business as verified by the CA in accordance with these Guidelines, or
 - 2. The business address for such Confirming Person specified in a current QGIS, QTIS, QIIS, Verified Professional Letter, or
 - 3. The address of the Applicant's Registered Agent or Registered Office listed in the official records of the Jurisdiction of Incorporation, or
- ii. By e-mail addressed to the Confirming Person at the business e-mail address for such person listed in a current QGIS, QTIS, QIIS, Verified Legal Opinion, or Verified Accountant Letter; or
- iii. By telephone call to the Confirming Person, where such person is contacted by calling the main phone number of the Applicant's Place of Business (verified in accordance with these Guidelines) and asking to speak to such person, and a person taking the call identifies him- or herself as such person; or
- iv. By facsimile to the Confirming Person at the Place of Business. The facsimile number must be listed in a current QGIS, QTIS, QIIS, Verified Legal Opinion, or Verified Accountant Letter. The cover page must be clearly addressed to the Confirming Person.

2. **Confirmation Response:** The CA MUST receive a response to the Confirmation Request from a Confirming Person that confirms the particular fact at issue. Such response MAY be provided to the CA by telephone, by e-mail, or by paper mail, so long as the CA can reliably verify that it was provided by a Confirming Person in response to the Confirmation Request.
3. The CA MAY rely on a verified Confirming Person to confirm their own contact information: email address, telephone number, and facsimile number. The CA MAY rely on this verified contact information for future correspondence with the Confirming Person if:
 - A. The domain of the e-mail address is owned by the Applicant and is the Confirming Person's own e-mail address and not a group e-mail alias;
 - B. The Confirming Person's telephone/fax number is verified by the CA to be a telephone number that is part of the organization's telephone system, and is not the personal phone number for the person.

3.2.11.5 Qualified Independent Information Source

A Qualified Independent Information Source (QIIS) is a regularly-updated and publicly available database that is generally recognized as a dependable source for certain information. A database qualifies as a QIIS if the CA determines that:

1. Industries other than the certificate industry rely on the database for accurate location, contact, or other information; and
2. The database provider updates its data on at least an annual basis.

The CA SHALL use a documented process to check the accuracy of the database and ensure its data is acceptable, including reviewing the database provider's terms of use. The CA SHALL NOT use any data in a QIIS that the CA knows is

- i. self-reported and
- ii. not verified by the QIIS as accurate.

Databases in which the CA or its owners or affiliated companies maintain a controlling interest, or in which any Registration Authorities or subcontractors to whom the CA has outsourced any portion of the vetting process (or their owners or affiliated companies) maintain any ownership or beneficial interest, do not qualify as a QIIS.

3.2.11.6 Qualified Government Information Source

A Qualified Government Information Source (QGIS) is a regularly-updated and current, publicly available, database designed for the purpose of accurately providing the information for which it is consulted, and which is generally recognized as a dependable source of such information provided that it is maintained by a Government Entity, the reporting of data is required by law, and false or misleading reporting is punishable with criminal or civil penalties. Nothing in these Guidelines shall prohibit the use of third-party vendors to obtain the information from the Government Entity provided that the third party obtains the information directly from the Government Entity.

3.2.11.7 Qualified Government Tax Information Source

A Qualified Government Tax Information Source is a Qualified Government Information Source that specifically contains tax information relating to Private Organizations, Business Entities or Individuals (e.g., the IRS in the United States).

1. **Verification Requirements:** The CA MUST verify whether the Applicant, the Contract Signer, the Certificate Approver, the Applicant's Jurisdiction of Incorporation, Registration, or Place of Business:
 - A. Is identified on any government denied list, list of prohibited persons, or other list that prohibits doing business with such organization or person under the laws of the country of the CA's jurisdiction(s) of operation; or
 - B. Has its Jurisdiction of Incorporation, Registration, or Place of Business in any country with which the laws of the CA's jurisdiction prohibit doing business.

The CA MUST NOT issue any EV Certificate to the Applicant if either the Applicant, the Contract Signer, or Certificate Approver or if the Applicant's Jurisdiction of Incorporation or Registration or Place of Business is on any such list.

2. **Acceptable Methods of Verification** The CA MUST take reasonable steps to verify with the following lists and regulations:
 - A. If the CA has operations in the U.S., the CA MUST take reasonable steps to verify with the following US Government denied lists and regulations:
 - i. BIS Denied Persons List - <https://www.bis.doc.gov/index.php/the-denied-persons-list>
 - ii. BIS Denied Entities List - <https://www.bis.doc.gov/index.php/policy-guidance/lists-of-parties-of-concern/entity-list>

3.2.12.3 Parent/Subsidiary/Affiliate Relationship

A CA verifying an Applicant using information of the Applicant's Parent, Subsidiary, or Affiliate, when allowed under [Section 3.2.4.1](#), [Section 3.2.5](#), [Section 3.2.6.1](#), or [Section 3.2.7.1](#), MUST verify the Applicant's relationship to the Parent, Subsidiary, or Affiliate. Acceptable methods of verifying the Applicant's relationship to the Parent, Subsidiary, or Affiliate include the following:

1. QIIS or QGIS: The relationship between the Applicant and the Parent, Subsidiary, or Affiliate is identified in a QIIS or QGIS;
2. Independent Confirmation from the Parent, Subsidiary, or Affiliate: A CA MAY verify the relationship between an Applicant and a Parent, Subsidiary, or Affiliate by obtaining an

Independent Confirmation from the appropriate Parent, Subsidiary, or Affiliate (as described in [Section 3.2.11.4](#));

3. Contract between CA and Parent, Subsidiary, or Affiliate: A CA MAY verify the relationship between an Applicant and a Parent, Subsidiary, or Affiliate by relying on a contract between the CA and the Parent, Subsidiary, or Affiliate that designates the Certificate Approver with such EV Authority, provided that the contract is signed by the Contract Signer and provided that the agency and Signing Authority of the Contract Signer have been verified;
4. Verified Professional Letter: A CA MAY verify the relationship between an Applicant and a Parent, Subsidiary, or Affiliate by relying on a Verified Professional Letter; or
5. Corporate Resolution: A CA MAY verify the relationship between an Applicant and a Subsidiary by relying on a properly authenticated corporate resolution that approves creation of the Subsidiary or the Applicant, provided that such resolution is:
 - i. certified by the appropriate corporate officer (e.g., secretary), and
 - ii. the CA can reliably verify that the certification was validly signed by such person, and that such person does have the requisite authority to provide such certification.

3.2.13 Final Cross-Correlation and Due Diligence

1. The results of the verification processes and procedures outlined in these Guidelines are intended to be viewed both individually and as a group. Thus, after all of the verification processes and procedures are completed, the CA MUST have a person who is not responsible for the collection of information review all of the information and documentation assembled in support of the EV Certificate application and look for discrepancies or other details requiring further explanation.
2. The CA MUST obtain and document further explanation or clarification from the Applicant, Certificate Approver, Certificate Requester, Qualified Independent Information Sources, and/or other sources of information, as necessary, to resolve those discrepancies or details that require further explanation.
3. The CA MUST refrain from issuing an EV Certificate until the entire corpus of information and documentation assembled in support of the EV Certificate Request is such that issuance of the EV Certificate will not communicate factual information that the CA knows, or the exercise of due diligence should discover from the assembled information and documentation, to be inaccurate,. If satisfactory explanation and/or additional documentation are not received within a reasonable time, the CA MUST decline the EV Certificate Request and SHOULD notify the Applicant accordingly.
4. In the case where some or all of the documentation used to support the application is in a language other than the CA's normal operating language, the CA or its Affiliate MUST perform the requirements of this Final Cross-Correlation and Due Diligence section using employees under its control and having appropriate training, experience, and judgment in confirming organizational identification and authorization and fulfilling all qualification requirements contained in [Section 5.3.2](#). Appendix D - Country-Specific Interpretative Guidelines (Normative)

NOTE: This appendix provides alternative interpretations of the EV Guidelines for countries that have a language, cultural, technical, or legal reason for deviating from a strict interpretation of the EV Guidelines. More specific information for particular countries may be added to this appendix in the future.

1. Organization Names

1. Non-Latin Organization Name

Where an EV Applicant's organization name is not registered with a QGIS in *Latin* characters and the Applicant's foreign character organization name and registration have been verified with a QGIS in accordance with these Guidelines, a CA MAY include a Latin character organization name in the EV Certificate. In such a case, the CA MUST follow the procedures laid down in this section.

2. Romanized Names

In order to include a transliteration/Romanization of the registered name, the Romanization MUST be verified by the CA using a system officially recognized by the Government in the Applicant's Jurisdiction of Incorporation.

If the CA can not rely on a transliteration/Romanization of the registered name using a system officially recognized by the Government in the Applicant's Jurisdiction of Incorporation, then it MUST rely on one of the options below, in order of preference:

- A. A system recognized by the International Organization for Standardization (ISO);
- B. A system recognized by the United Nations; or
- C. A Lawyer's Opinion or Accountant's Letter confirming the proper Romanization of the registered name.

3. Translated Name

In order to include a Latin character name in the EV certificate that is not a direct Romanization of the registered name (e.g. an English Name) the CA MUST verify that the Latin character name is:

- A. Included in the Articles of Incorporation (or equivalent document) filed as part of the organization registration; or
- B. Recognized by a QGIS in the Applicant's Jurisdiction of Incorporation as the Applicant's recognized name for tax filings; or
- C. Confirmed with a QGIS to be the name associated with the registered organization; or
- D. Confirmed by a Verified Legal Opinion or Accountant's Letter to be a translated trading name associated with the registered organization.

Country-Specific Procedures

D-1. Japan

As interpretation of the procedures set out above:

1. Organization Names

- A. The Revised Hepburn method of Romanization, as well as Kunrei-shiki and Nihon-shiki methods described in ISO 3602, are acceptable for Japanese Romanizations.
- B. The CA MAY verify the Romanized transliteration, language translation (e.g. English name), or other recognized Roman-letter substitute of the Applicant's formal legal name with either a QIIS, Verified Legal Opinion, or Verified Accountant Letter.
- C. The CA MAY use the Financial Services Agency to verify a Romanized, translated, or other recognized Roman-letter substitute name. When used, the CA MUST verify that the translated English is recorded in the audited Financial Statements.
- D. When relying on Articles of Incorporation to verify a Romanized, translated, or other recognized Roman-letter substitute name, the Articles of Incorporation MUST be accompanied either: by a document, signed with the original Japanese Corporate Stamp, that proves that the Articles of Incorporation are authentic and current, or by a Verified Legal Opinion or a Verified Accountant Letter. The CA MUST verify the authenticity of the Corporate Stamp.
- E. Appendix E - Sample Contract Signer's Representation/Warranty (Informative)

A CA may rely on the Contract Signer's authority to enter into the Subscriber Agreement using a representation/warranty executed by the Contract Signer. An example of an acceptable warranty is as follows:

[CA] and Applicant are entering into a legally valid and enforceable Subscriber Agreement that creates extensive obligations on Applicant. An EV Certificate serves as a form of digital identity for Applicant. The loss or misuse of this identity can result in great harm to the Applicant. By signing this Subscriber Agreement, the contract signer acknowledges that they have the authority to obtain the digital equivalent of a company stamp, seal, or (where applicable) officer's signature to establish the authenticity of the company's website, and that [Applicant name] is responsible for all uses of its EV Certificate. By signing this Agreement on behalf of [Applicant name], the contract signer represents that the contract signer

- i. is acting as an authorized representative of [Applicant name],
- ii. is expressly authorized by [Applicant name] to sign Subscriber Agreements and approve EV Certificate requests on Applicant's behalf, and
- iii. has confirmed Applicant's right to use the domain(s) to be included in EV Certificates.
